General information and explanatory notes (retain for future reference)

What is a bore?

The most common type of bore is a hole which is drilled by a large drilling rig. The definition of a bore also include a sump, well, drag line or any excavation used to intercept, collect and store groundwater for the purpose of taking and using it.

Why do I need a licence to construct a bore?

Under the provisions of the *Water Act 1989 (Vic)*, any person who constructs, alters or replaces a groundwater bore greater than three metres in depth must obtain a licence to construct works prior to commencing.

What is the difference between an investigation and observation bore?

Investigation bores are constructed for the purpose of investigating the potential to access underground water resources at a specified location. A works licence issued for investigation authorises the drilling of a number of test holes but does not authorise any bores to be retained or constructed after the drilling rig has been removed from the site.

If a works licence is issued for investigation, groundwater may not be taken or used for any purpose apart from water quality testing.

Observation bores are constructed for the purpose of monitoring groundwater levels at a particular site. Bores may only be constructed to a maximum diameter of 130mm unless specifically approved by GMW. Water may only be extracted from these bore(s) for the purposes listed below:

- measurement of offsite impacts
- as part of a state or authority measurement network
- observation of environmental issues
- undertaking hydro geological assessments if directed as part of an application for a licence to take and use water

What if I can't get the bore/s drilled or constructed within the 12 month period of the licence?

If the work has not been completed by the expiry date, the licence may be renewed once only. If works have not been carried out within the licence renewal period, an application for a new licence will be required.

Who can drill the bore/s and when can they start work?

You must engage a licensed driller to drill and construct a new or replacement bore or if you are altering an existing bore. Your nominated driller cannot commence drilling until you have obtained a licence to construct works. The licence conditions must be clearly understood by yourself and your nominated driller before drilling is undertaken.

Do I need to notify GMW when the bore is completed?

Yes, you should forward the form provided with your licence called the *Notice of Outcome* to GMW as soon as works are complete. Your licensed driller is responsible for submitting a formal bore completion report to GMW within 28 days of completion of the works.

What does the application fee cover?

Application fees cover the full cost of undertaking a licence assessment in accordance with GMW's legal obligations under the *Water Act 1989 (Vic)*.

What happens after I lodge my application?

After you lodge your application GMW will notify you in writing that it has been received. The timeframe to complete an assessment may vary depending on the nature of your application. When the decision has been made in relation to your application you will be notified in writing of the outcome, either that the application has been approved or refused. Application fees are not refundable if an application is refused.
