General information and explanatory notes (retain for future reference)

What are the benefits of transferring a Licence to Take and Use Surface water / Groundwater and Operating Works?

Transferring surface water or groundwater entitlement provides existing licensed water users with the opportunity to maximise the value of their licence by selling their unused entitlement, and provides others with the ability to purchase water entitlements in areas where new entitlement is not available.

What are the rules relating to the Permanent transfer of a licence?

Rules have been established to allow the permanent transfer of entitlement. These rules for transfer are part of the Upper Ovens Water Management Plan which was approved by the Victorian Minister for Water in January 2012. The following general rules apply to permanent transfer of a licence to take and use surface water and groundwater:

- The transfer of entitlement is limited to the term of the current financial year. The transferred volume reverts back to the sellers Licence on 1 July in the following year. Any volume transferred to a licence for one year cannot be transferred on to another licence.
- Permanent transfers are permitted downstream on the same stream, subject to a reduction in the transferred volume of 20%.
- Permanent transfers are permitted upstream or out of catchment, subject to winter take conditions.
- Transfer of a licence is not permitted to or from farm dams unless there is a standard Licence to Take and Use Water and Operate Works has been issued. A registration licence can be converted to a standard Licence upon request to GMW. Please contact the Licensing Unit for further information.
- If a licence has been issued with winter-fill condition, it cannot be transferred to a licence which has been issued as an all-year licence.
- All transfers into unregulated sub-catchments are subjected to an assessment against the sustainable diversion limit to determine whether they can be permitted. If your sub catchment is fully committed you will only be allowed to transfer from another licence within your sub catchment.
- Water cannot be used by the buyer until the transfer has been approved and GMW has notified all parties in writing.
- If the sellers licence is in operational use, the pumping system must be metered according to GMW's requirements before a transfer can be approved.
- The buyer must have a Licence to Take and Use Groundwater an Operate Works before an application for a permanent transfer can be approved.
- For specific details about trading in the Upper Ovens Water Supply Protection Area refer to the Water Management Plan which is available from www.gmwater.com.au

You are urged to contact GMW prior to making an application to ensure you have a full understanding of the conditions which apply to the permanent transfer of licence entitlement in your area. For information and maps, please refer to the GMW website at www.gmwater.com.au/water-resources/ground-water.

How do I know which trading zone and trading rules apply to my licence?

Trading rules have been established under Upper Ovens Water Management Plan. Your licence document lists the management zone applicable to your licence. A copy of your licence can be obtained by contacting the Licensing Unit (fees apply).

Plans and Rules have been established where groundwater has been, or has the potential to be, intensively developed. If you intend to apply for a temporary licence transfer you are urged to contact GMW prior to making an application to ensure you have a full understanding of the conditions which apply to the temporary transfer of licence entitlement in your area. For information and maps, please refer to the GMW website at www.gmwater.com.au/water-resources/ground-water. Information relating to trading rules applicable to your licence is available from the GMW website. If you cannot access the internet please contact the Licensing Unit to request a copy of the relevant Fact Sheets by mail or fax.

Where can I get more information about trading opportunities and current prices in my area?

You should visit the GMW website to obtain information about trading rules and restrictions applicable to your licence before proceeding to locate a buyer or seller for your licence volume. If you are still unsure about the rules you should contact the Licensing Unit to discuss your proposal.

GMW cannot provide you with information on the current market value of water; however you if you decide to proceed with a transfer, information about market activity and pricing can be obtained from your local water broker. Details of brokers in your area can be located in the yellow pages or through advertisements in your local newspaper.

How does GMW assess an application?

When assessing an application for the permanent transfer of a licence GMW must consider any impacts on existing authorised users of groundwater and the environment. If this assessment indicates that there is a significant risk of impacting other users or the environment additional information will be required from the applicant. GMW may require that technical investigations, hydrogeological assessments and/or pumping tests are undertaken to demonstrate that the proposal will not adversely impact upon existing authorised groundwater users and the environment. Completion of this work, if applicable, will be required before the transfer of groundwater entitlement is considered. Please note that the costs of any technical work are paid by the applicant. If you are required to undertake such work you will be notified by GMW.

What happens when I lodge my application?

After you lodge your application GMW will notify you in writing that it has been received. The timeframe to complete an assessment may vary depending on the nature of your application. There may be delays if you are required to engage a consultant to conduct a technical assessment in support of your application. If delays are expected you will be notified by GMW. When the decision has been made to your application you will notified in writing of the outcome, either that the application has been approved or refused. Application fees are not refundable if an application is refused.

Do I need to meet the new Irrigation Development Guideline requirements?

If the licence being transferred will be used for irrigation an Irrigation Development Guideline Assessment will be required if you intend to:

- irrigate land that has never been irrigated before,
- increase the annual use limit on the land in the current licence, or,
- increase the area allowed to be irrigated in the current licence.

You will be contacted if the Irrigation Development Guidelines apply to you.

Do I have to advertise my application in the newspaper or notify my neighbours (buyer only)?

After you lodge your application, GMW will notify you in writing if you are required to advertise and/or notify your neighbours. GMW will send out the proforma for advertising and notification to neighbours, this will include a reference number which relates to your application. If the volume sought in the application is 20ML or greater you will be required to advertise and notify neighbours, if the volume is 19ML or less, only notification of neighbours will apply.

What volume of water is available to the buyer when a permanent transfer is approved?

The permanent transfer of a licence to take and use water includes:

- (a) Transfer of the licence entitlement for the requested volume from the sellers to the buyer's existing or new licence.

When can the buyer take and use water under the licence?

The buyer can take and use water upon written confirmation from GMW that the transfer has been approved. Use may be restricted from time to time in accordance with the conditions of the licence.

Are there ongoing costs associated with having a Licence?

Yes, a Licence to Take and Use Water and Operate Works is subject to annual fixed charges, issued by GMW in July each year. For specific details about which charges will apply to your licence, please contact the Licensing Unit.
